

■ Barometric Pressure sensor

WxB-101L

WxB-101L measures the atmospheric pressure using internal silicon capacitive, Which ensures long-term stability and high accuracy of the pressure measurement. The measured pressure data is displayed on the LCD window via the RS-232 interface and protocol. It can be used for general purpose use and high precision weather observation.

Specifications

Measuring Range	500 ~ 1,100 hPa
Resolution	0.1 hPa
Accuracy	±0.5 hPa
Operating Environment	-40 °C ~ +60 °C
Power	9 ~ 15 V DC
Response Time	< 1 sec
Dimension	86 × 56 × 36(cm)
